

## ModelInterFace.java

```
1 package com.tavor.project;
2
3 //ModleInterface-every class should implements :
4 public interface ModelInterFace {
5
6     public abstract double Convert(String from, double amuont, String to); //
    gets 3 vars return result
7
8     public abstract String getDate();// return the last update date
9
10    public abstract String[] getData();// return data from sever/xml..
11 }
12
```
